

Patient Portal

Patient portal provides a way for you to communicate with our practice, securely and efficiently during our business hours.

Using the patient portal will allow you to do the following:

View your personal health records and update as needed.

View your lab results.

Request for appointments or change appointment dates, or see date/time of upcoming appointments.

Request a prescription refill from pre-populated list of currently refillable prescriptions in your record.

Manage your personal information.

Send emails or messages to our staff during business hours.

Patient Portal is just a click away for you once you have chosen to be web-enabled by our staff.
(FYI: no duplicate emails can be entered into system- if multiple members of same family)

I am not interested in use of the Patient Portal at this time.

Please sign me up for Patient portal access using the email address provided below:

Patient Email

By signing, you are acknowledging receipt of our patient portal offer as well as our office policies and procedures.
